Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Examiner issues a new non-final rejection because the amendment and response have since been given to the examiner to determine if the submissions overcome the rejections of record. The examiner's review of the amendment and response are deemed to overcome the rejections of record. Therefore, the amendment and response will be entered into the application and hence, the holding of abandonment is withdrawn. Accordingly, the petition to withdraw holding of abandonment is Granted.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5 are rejected under 35 U. S.C. 103(a) as being unpatentable over Vaghefi et al. (USPN 6429851 B1) in view of Tamada (USPN 4582498), hereinafter simply Vaghefi and Tamada.

In regard to claim 2, Vaghefi teaches a computer mouse comprising: a lower case comprising front and rear portions, the rear portion of the lower case adapted to receive the bottom wall of the liquid-filled compartment, the front portion of the lower case adapted to receive electronic components of the computer mouse; see Fig.1, col.3 lines 10-28, and upper case adapted to cover the electronic components of the computer mouse secure the light bulbs which are the vacuum tubes and have the same characteristic as liquid filled compartment, see

Fig.17, col.3 lines 60-67. Vaghefi does not teach a liquid-filled compartment, the liquid-filled compartment comprising a see-through external wall and bottom wall, and liquid with decorative article floating on the surface of the liquid. However, Tamada teaches a liquid-filled compartment, the liquid-filled compartment comprising a see-through external wall and bottom wall, and liquid with decorative article floating on the surface of the liquid. See Fig.1, col.1 lines 57-62. It would have been obvious to a person of ordinary skill in the art at the time of the invention to incorporate the liquid-filled compartment of Tamada into the mouse of Vaghefi because the transparent vessel of Tamada combines with the mouse of Vaghefi for providing a toy which interests a viewer, when used, by rocking the vessel to impart various motions to an ornamental member enclosed in the vessel. See col.1 lines 57-62.

3. In regard to claim 3, Vaghefi teaches a computer mouse, wherein the upper case comprises an internally stepped edge and the liquid-filled compartment comprises a stepped edge correspondingly fitted to the internally stepped edge of the upper case to firmly connect the liquid-filled compartment to the upper case. See Fig.1.

4. In regard to claim 4, Vaghefi teaches a computer mouse, wherein the upper case and the liquid-filled compartment (bulb) are secured together by an adhesive. See Fig.17.

5. In regard to claim 5, Vaghefi teaches a computer mouse, wherein the upper case is transparent, having capability for light go through. See col.3 lines 60-67.
